### GENERAL INFORMATION

WETCIT is a highly effective surfactant designed for use with insecticides, miticides, fungicides, herbicides, plant growth regulators and nutrients requiring a wetting and spreading agent. WETCIT assists in overcoming water repellence. A spray adjuvant added to some pesticide or pesticide tank mixes may cause some phytotoxicity to susceptible crops or plants. Caution should be used when applying WETCIT; it is advisable to apply to a small area before full-scale treatments are made.

### NOTE ON PESTICIDE EFFICACY EFFECTS

WETCIT may increase the response of translaminar and systemic type insecticides, miticides, and fungicides. The user or applicator should evaluate this response prior to widespread usage.

### MIXING DIRECTIONS

Fill tank one-half full of water. Add the required amount of pesticide while agitating. Add remainder of the water. Add the recommended amount of WETCIT last and continue agitation until completion of spraying. For best results, use within 72 hours of mixing. **DO NOT ADD THIS PRODUCT AT A RATE THAT WILL EXCEED 0.8% (100 oz. per 100 gallons) OF THE FINISHED SPRAY VOLUME.**

### DIRECTIONS FOR USE

Prior to use, read all the directions on this label and on the label of the manufacturer's insecticides, miticides, fungicides, herbicides, plant growth regulators or nutrients being used with this product. The manufacturer's label for specific usage and restrictions has precedence over directions for use referred to on the WETCIT label. To ensure thorough mixing, it is suggested that you recirculate mini tanks and bulk tanks or shake containers before using.

Ensure spray equipment is thoroughly cleaned before using WETCIT. Coatings on inner tank and spray lines, from previous chemicals sprayed, may be dissolved by WETCIT, thereby releasing it into the mix about to be sprayed. If in doubt, applying as directed, add 20 ounces of WETCIT to 20 gallons of water circulate through system for 20 minutes, spray to waste. **THEREAFTER**, mix as prescribed for regular spraying.

Treat a small area and observe results. If the results are satisfactory, proceed with a complete application. Caution: Do not apply to tree fruit or other sensitive crops without first consulting your ORO Agri representative.

#### **Wetting / Spreading / Surface Tension Reduction:**

**Insecticides, Miticides, and Fungicides** - Use 25 to 100 fl. oz. of WETCIT per 100 gallons of pesticide and / or foliar fertilizer spray solution.

**Plant Growth Regulators and Nutrients** - Use 5 to 10 fl. oz. of WETCIT per 100 gallons of spray solution.

**Herbicides** – Use 25 to 100 oz. of WETCIT per 100 gallons of spray solution.

**Backpack or Hand Held Sprayers** - Use 1/4 to 1/2 teaspoon per gallon of spray solution.

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

#### **STORAGE:**

Store out of reach of children. Keep container closed when not in use. Avoid temperatures below 34°F (5°C) and above 100°F (40°C).
